

On January 16, 2001, ALA Council, the governing body of the American Library Association, unanimously approved the following policy. The policy was written by the Americans with Disabilities Act Assembly, a representational group administered by the Association of Specialized and Cooperative Library Agencies (ASCLA), a division of the American Library Association.

Library Services for People with Disabilities Policy

The American Library Association recognizes that people with disabilities are a large and neglected minority in the community and are severely underrepresented in the library profession. Disabilities cause many personal challenges. In addition, many people with disabilities face economic inequity, illiteracy, cultural isolation, and discrimination in education, employment and the broad range of societal activities.

Libraries play a catalytic role in the lives of people with disabilities by facilitating their full participation in society. Libraries should use strategies based upon the principles of universal design to ensure that library policy, resources and services meet the needs of all people.

ALA, through its divisions, offices and units and through collaborations with outside associations and agencies is dedicated to eradicating inequities and improving attitudes toward and services and opportunities for people with disabilities.

For the purposes of this policy, “must” means “mandated by law and/or within ALA’s control” and “should” means “it is strongly recommended that libraries make every effort to...”

1. The Scope of Disability Law

Providing equitable access for persons with disabilities to library facilities and services is required by Section 504 of the Rehabilitation Act of 1973, applicable state and local statutes and the Americans with Disabilities Act of 1990 (ADA). The ADA is the Civil Rights law affecting more Americans than any other. It was created to eliminate discrimination in many areas, including access to private and public services, employment, transportation and communication. Most libraries are covered by the ADA’s Title I (Employment), Title II (Government Programs and Services) and Title III (Public Accommodations). Most libraries are also obligated under Section 504 and some have responsibilities under Section 508 and other laws as well.

2. Library Services

Libraries must not discriminate against individuals with disabilities and shall ensure that individuals with disabilities have equal access to library resources. To ensure such access, libraries may provide individuals with disabilities with services such as extended loan periods, waived late fines, extended reserve periods, library cards for proxies, books by mail, reference services by fax or email, home delivery service, remote access to the OPAC, remote electronic access to library resources, volunteer readers in the library, volunteer technology assistants in the library, American Sign Language (ASL) interpreter or realtime captioning at library programs, and radio reading services.

Libraries should include persons with disabilities as participants in the planning, implementing, and evaluating of library services, programs, and facilities.

3. Facilities

The ADA requires that both architectural barriers in existing facilities and communication barriers that are structural in nature be removed as long as such removal is “readily achievable.” (i.e., easily accomplished and able to be carried out without much difficulty or expense.)

The ADA regulations specify the following examples of reasonable structural modifications: accessible parking, clear paths of travel to and throughout the facility, entrances with adequate, clear openings or automatic doors, handrails, ramps and elevators, accessible tables and public service desks, and accessible public conveniences such as restrooms, drinking fountains, public telephones and TTYs. Other reasonable modifications may include visible alarms in rest rooms and general usage areas and signs that have Braille and easily visible character size, font, contrast and finish.

One way to accommodate barriers to communication, as listed in the ADA regulations, is to make print materials available in alternative formats such as large type, audio recording, Braille, and electronic formats. Other reasonable modifications to communications may include providing an interpreter or realtime captioning services for public programs and reference services through TTY or other alternative methods. The ADA requires that modifications to communications must be provided as long as they are “reasonable,” do not “fundamentally alter” the nature of the goods or services offered by the library, or result in an “undue burden” on the library.

4. Collections

Library materials must be accessible to all patrons including people with disabilities. Materials must be available to individuals with disabilities in a variety of formats and with accommodations, as long as the modified formats and accommodations are “reasonable,” do not “fundamentally alter” the library’s services, and do not place an “undue burden” on the library. Examples of accommodations include assistive technology, auxiliary devices and physical assistance.

Within the framework of the library’s mission and collection policies, public, school, and academic library collections should include materials with accurate and up-to-date information on the spectrum of disabilities, disability issues, and services for people with disabilities, their families, and other concerned persons. Depending on the community being served, libraries may include related medical, health, and mental health information and information on legal rights, accommodations, and employment opportunities.

5. Assistive Technology

Well-planned technological solutions and access points, based on the concepts of universal design, are essential for effective use of information and other library services by all people. Libraries should work with people with disabilities, agencies, organizations and vendors to integrate assistive technology into their facilities and services to meet the needs of people with a broad range of disabilities, including learning, mobility, sensory and developmental disabilities. Library staff should be aware of how available technologies address disabilities and know how to assist all users with library technology.

6. Employment

ALA must work with employers in the public and private sectors to recruit people with disabilities into the library profession, first into library schools and then into employment at all levels within the profession.

Libraries must provide reasonable accommodations for qualified individuals with disabilities unless the library can show that the accommodations would impose an “undue hardship” on its operations. Libraries must also ensure that their policies and procedures are consistent with the ADA and other laws.

7. Library Education, Training and Professional Development

All graduate programs in library and information studies should require students to learn about accessibility issues, assistive technology, the needs of people with disabilities both as users and employees, and laws applicable to the rights of people with disabilities as they impact library services.

Libraries should provide training opportunities for all library employees and volunteers in order to sensitize them to issues affecting people with disabilities and to teach effective techniques for providing services for users with disabilities and for working with colleagues with disabilities.

8. ALA Conferences

ALA conferences held at facilities that are “public accommodations” (e.g. hotels and convention centers) must be accessible to participants with disabilities.

The association and its staff, members, exhibitors, and hospitality industry agents must consider the needs of conference participants with disabilities in the selection, planning, and layout of all conference facilities, especially meeting rooms and exhibit areas. ALA Conference Services Office and division offices offering conferences must make every effort to provide accessible accommodations as requested by individuals with special needs or alternative accessible arrangements must be made.

Conference programs and meetings focusing on the needs of, services to, or of particular interest to people with disabilities should have priority for central meeting locations in the convention/conference center or official conference hotels.

9. ALA Publications and Communications

All ALA publications, including books, journals, and correspondence, must be available in alternative formats including electronic text. The ALA Web site must conform to the currently accepted guidelines for accessibility, such as those issued by the World Wide Web Consortium.
