

Planning for Using Booktalks in Library Programming

1. What type of program are you considering?
2. Where/when will you do the programming?
3. List three different audiences you will target.
4. List types or sample titles of books you will use with each audience.
5. Approximately how many titles will you booktalk for each audience?
6. How will you make the titles you've booktalked available for circulation?
