

Exercise #4

Identify Potential Community Partners

In this exercise you will identify potential community partners in your area.

Instructions: Get into groups of four or five. Identify potential community partners. Think of activities you do or wish to do. Who in the community is likely to help you in some way? Create a general list with your group but start thinking of your own situation. Identify specific goals and partners. For example, the school librarians at the three closest elementary schools or the owner of the Panaderia Hernandez.
