

Exercise 4CD The Observer(s)

Instructions: You will observe the practice, which involves a library user discussing a problem with a library employee. Afterwards, you will be asked to discuss and write your observations with your small group and later with the entire class. Think about how the average person might respond to the behavior of the library employee.

You will not speak. If you like, you can take notes during the practice session and begin to answer the questions on the exercise sheet. Watch how well the library employee matches the speed, rhythm, body language and use of space of the library employee.
