

Gateway Public Access Computer Solutions

Why choose Gateway's PAC models as your public computers...

- 1. Security** - PAC models include three security levels to keep the integrity of the computer's configuration and to help protect user's privacy.
Centurion Data Drive Lock or DriveShield Software - Public Access Security Software Tool - Computer Restoration Media Disk
- 2. Training** - Gateway's PAC models come installed with a suite of computer-based tutorials. Patrons and staff can easily learn how to use a computer and specific software applications at anytime right from the computer. The PAC models include the following training tutorials:
- Tutorials for Windows XP, MS Office, FrontPage, Publisher, HTML, and Internet Explorer
- 3. Value** - To help meet your budget, Gateway is offering three public access computer models with significant savings. Each computer includes a robust configuration to provide a great patron experience and to help prolong the use of your investment.
