

Exercise #3 Forms and If Else

In this exercise you will practice forms and IF ELSE statements.

A. Create the PHP code for the profession example discussed in class.

1. Open Notepad and begin a new file.
2. Looking at the page on <http://phpclass.infopeople.org/lisa/profession.php>, click View and Source.
3. Highlight and copy all of the text of from “<form action” all the way to “</form>.”
 - Do NOT copy the bottom line that reads, “Hello, . I understand you are a woman working as a .”
4. Paste the copied text from step 3 into the Notepad file and save as **profession.php** to your desktop.
5. Still using the same file, create the php coding to create the user by name, state the user’s gender and profession.

B. Save and view the file

1. Again, save your file to the desktop as **profession.php**.
2. Copy the file and paste it into your sub-directory on the remote server.
3. View it in the browser by going to **<http://phpclass.infopeople.org/yourname/profession.php>**.

Exercise #3 Answer Sheet

```
<?php
Print "Hello, $name.<br>";
If ($sex=="M")
{Print "I understand you are a man working as a
$profession.";}
Else
{Print "I understand you are a woman working as a
$profession.";}
?>
```
