

Action Plan: Next Steps

In this group exercise we will plan and discuss actions you can take in order to use what you've learned in today's workshop.

Instructions: Take a few minutes in your group to annotate this Action Plan with one or two items under each question. We will then discuss and share our ideas.

- 1. What are the two or three most useful things you have learned in today's workshop that you would like to share with your colleagues?**

- 2. How will you share what you've learned with other staff?**

- 3. How will you use what you've learned with patrons?**

- 4. What tools can you create or activities can you use to help users find reliable health information on the web?**
