

Exercise #4

Printing information from the Internet

In this exercise you will practice creating a lesson plan for teaching Spanish-Speaking patrons to print information from the Internet.

1. In this exercise you will work individually.
2. Take about 20 minutes to develop a five-minute lesson *in Spanish* that includes:
 - a. A description of the lesson and the learning objectives
 - b. The steps to print a full web page and a portion of a web page
 - c. A description of a practice exercise on printing information from the Internet

Bonus: If have time, develop a description of an exercise that you would use to test your patron's competence to print information from the Internet.

3. Use the following resources from your packet:
 - a. Printing Information from the Internet Quick Guide
 - b. Training Components handout
 - c. Lesson Sample
4. Check your lesson against the Lesson Sample and make any needed modifications.
