

Statewide Information Service/Product Concepts

Your input is important to us! The following are common themes and a few sample ideas of Statewide Information Services/Products. Please select the ones that we should focus our energies on to begin to move forward.

COMMON THEMES

Please select (x or ✓) the top 3 themes that you think we should pursue.

- Concept of embedded librarian
- Mobile, personal, seamlessly integrated
- Creating information experiences – opportunity for everyone in a community to contribute
- Freeing dark data for users to find
- Librarians microblogging information/ideas/questions/answers
- Finding and connecting libraries and all kinds of collections in an integrated approach
- Creating more connections between customers(collections, ideas, hobbies)
- Truthiness – debunking
- Map deepest collections – rich collections
- Data mash-ups

SAMPLE IDEAS

Please select (x or ✓) the top 3 ideas that you think we should pursue.

- Information fitness test – for fun! Meant to build awareness and could be used locally to point to resources
- Question of the Day Contest – Libraries subscribe
- Visual mapping to help people find dark collections and staff/experts to help – would build off of a personal profile
- Invite the public to play/hack library data that relates to check materials etc – invitation to create mash-ups – have contests
- Question answering that is not tied to specific platform – facilitate other people doing for themselves – serendipity – not anonymous
- Find partners to facilitate the role of librarians to validate information – addressing the truthiness of information

OTHER IDEAS

Please share with us any other ideas you have to statewide information services/products.

THANK YOU!
