“From the neatly defined roles reflected in library school courses of the mid-70s to the thousands of job titles collected in the SLA’s recent salary survey, we librarians or information professionals definitely aren’t what we once were. If we play our KM or “knowledge engineer” cards right, there are very few areas in any organization in which we won’t have significant contributions to make.”

“Education for Changing Roles” by Gaye Colvin.
Information Outlook, Oct/Nov 2009, p. 21
